Systemmöbel

What do we expect from our furniture?
There are many different answers to this question. But even many opinions which are the same. Addition is a good keyword. Furnishings increase over time. Things will be added permanently and this is of course not only furniture. These are objects for everyday commodities, objects we don't need but which we like to have. Important things and unimportant ones. Pretty things and trivial ones. The human being is in the centre of all these things and stories because everything has to do with him. Wouldn't it be nice if some subjects would take back themselves so that others will attract more attention? Is there a kind of basic principle on which we can build up?
We like to produce this kind of furniture: the base. Furniture which appearance leaves space for other things. Because our furniture always gets there where something exists and they should not eliminate but integrate themselves. To exist as a basis there should be many possibilities. But even then it must not always suit. Because we know that, we can adapt our furniture: to dimensions, to colours, to wishes. Following the fashion is foreign to us. We talk about validity.

Overview

S+ Collection
The Planning book is divided into programs

System M Shelf	P. 08	System M Sideboard	P. 28	Table M04	P. 60
Vertical wall profile	P. 10	Horizontal wall profile	P. 30	Stand alone table square	P. 62

Kanji F	P. 90				

S+ Systemmöbel

Ten years of S+, that's right, but it's not the whole story either. We have already been manufacturing system furniture in Germany for 28 years. Our experience began in 1995 when we took over the production of a series of system furniture. Founded at that time as sdr+, we saved the furniture systems from being discontinued in Germany. Preservation was to be our task for many years and became our DNA. But in 2012, the licences for sdr+ came to an end and we were faced with the question of what to do with 18 years of experience and the Table M04 and the Side Table M05 in our luggage and decided to start something new. S+ Systemmöbel was born: new production possibilities and our direct contact with dealers, planners and end customers, their expectations and wishes gave rise to a new system that unites two classic themes in furniture history, the shelf and the carcass furniture. System M by Thomas Merkel is the basis of the S+ collection today. Continuously maintained and further developed, it is popular with planners and customers for its flexibility and adaptability. Further additions to the collection such as the Side tables Kaiser and Kanji and the Lotus Table were added in the following years. And most recently with other newly developed products such as Nitō, whose origins go back further than our own and Benchi from the year 2023, S+ continues to move forward today.

Design

Thomas Merkel is more than 25 years committed to this brand with his clear design. His wide experience is based on the collaboration with well-known designers and the realization of ideas into marketable products. His furniture are systems which can be individualized for the reason to integrate into the environment. They don't want to dominate but to fit. His work is quiet, balanced and appears always as a matter of course without asking questions. All his drafts show his vision of design: for him, design is more than only an idea. The detail and the realization are the determining differences in the quality of the completed product and the standards he sets himself every day. His work is thought-out, the details are worked out, changed, rejected and then achieved in a new way. Not different at any cost but always better in details. Until today his work is accompanied by numerous awards.

System M

System M is the basis for the things in life, for books and documents, for dishes and vases, for CDs and paper, for office and home, for the meeting room and for the living room. It can hold everything we like to store, to present or to hide. The basis will mostly be loaded much. Because of this it should be solid and long-lasting. This is not only valid for the structure but also for the appearance. The elements of the basic configuration consist of steel and have an epoxy powder coated surface. All parts of the System M are separately removable. Everything can be arranged in new ways and many things can be changed: A fold down door can be replaced by drawers, initially mounted on the wall and then placed on the floor. Many options are possible because we know that everything can change. System M will change like our furniture, too. It will grow and will adapt. We like to create a qualified basis for a furniture-system which meets the requirements. Your requirements.

Planning

This document shows all the possibilities offered by System M and our other furniture programmes. It lists the individual elements, gives their dimensions (WTH) and versions. The colours used correspond to the RAL colour system. For the colour selection, the article number must be supplemented with the respective letter for the colour: W, A, B, S or J.

W = Traffic white RAL 9016
A = Traffic grey A RAL 7042
B = Traffic grey B RAL 7043
S = Traffic black RAL 9017
J = Papyrus white RAL 9018
Special colours are possible.

On our website, you will find corresponding configurators for all our furniture programmes, which make planning very easy for you. There you will also find many planning and price examples.

Mounting

Prerequisite for the installation are solid and resilient walls. Weaker walls can only carry smaller loads. The walls should be carefully considered before any planning. Included with the wall profiles are screws in size 5 x 60 mm, but no anchor bolts, because we do not know which walls are present. Only use anchor bolts that are suitable for the existing wall and observe the resulting possible loads that can accommodate the system. The longer the wall profiles, the more screw holes and the higher the load bearing capacity. For mounting on walls, you need a pencil, a ruler, an air level, a drill, a screwdriver and anchor bolts suitable for the existing wall. The vertical wall profiles serve as a mounting template.

Care

The elements of System M are equipped with a robust powder-coating. To remove light dirt, use best a soft, damp cotton cloth. Stronger impurities should be treated with water diluted household cleaner. To remove felt pen, pen and other stubborn stains the use of dilute alcohol or mineral spirits is recommended. Vinegar cleaner removes limescale. After cleaning, the surface is to be treated with a mild household detergent or water and wiped dry with a soft cloth or chamois leather. Please do not use any abrasive cleaners or nitro thinners or acid or alkaline cleaning agents. It is also advisable to remove stains immediately. For more information please visit www.systemmoebel-plus.com.

System M Shelf

Vertical wall profiles allow shelves and corpora to be hung in any order with a wide variety of fittings in the System M shelving by Thomas Merkel.

The shelves are suspended by means of a shelf support that can be inserted into the profile from the front and placed in a 4 cm grid.

Design: Thomas Merkel, 2011

Vertical wall profile

sheet steel 2 mm, powder-coated, with screws 5 x 60 mm for wall mounting

Article no.	Article			Sales price excl. VAT
M 110 000 044	Vertical wall profile 44 cm	3 screw holes	11 grid positions	47.00 €

Vertical wall profiles will be screwed to the wall at intervals of 80 or 120 cm. They allow the hanging of different elements. A bottom support will be inserted vertically from the front in the profile, rotated by 90 degrees and is therefore safe in the hidden gridding of the profile. The grid for the bottom supports is 4 cm for optimal height classifications. If profiles will be added on each other the grid will be continued equally. All elements can be clipped in this way that the sides end above and

below with the profile. The distance of the screw holes is 20 cm. So the profiles can serve as a mounting template for the grid dimensions of 80 and 120 cm. Because of the fact that the upper and lower screw holes each have a distance from 2 cm to the end of the profile, that means that they are the same at the top and the bottom, it is not necessary to consider the direction of the profile while mounting it. For the total mass outside the grid dimensions (80 or 120 cm) have to be

summed up and 2.1 cm have to be added. The total depth of the shelving system (without grips) is the depth of the shelf or of the corpus 40 cm + 3.3 cm. For mounting proof and resilient walls are required. Weaker walls can only carry lower loads. For an easy mounting there should be a distance of 3-4 cm right and left next to the profiles. At the beginning of the mounting at a height of 32 cm (bore 34 cm) a corpus is placed at the table height of 72 cm.

C-profile for ground-based wall mounting

steel sheet 1.5 mm, powder-coated, with foot and adjustable foot

Article no.	Article	Sales price excl. VAT
M 120 000 204	C-profile for ground-based wall mounting 204 cm for vertical wall profile 184 cm	187.00 €

B	Traffic grey B	
S	Traffic black	

Vertical wall profiles are inserted in the C-profiles and screwed to the wall in a distance of 80 or 120 cm by using three wall mounts per profile. All elements can be clipped in this way that the sides end above with the profile. The distance to the bottom is 20 cm for an element which is clipped below. The vertical wall profiles serve as a mounting template for the grid dimensions 80 and 120 cm. For the complete external dimension the grid dimensions (80 and accordingly 120 cm) have to

be summed up and 8 cm have to be added. The complete depth of the shelf (without grips) is the depth of one shelf or of a corpus 40 + 5.5 to 6.5 cm. The loads will be removed on the ground. Prerequisite for the installation are solid and resilient walls. Weaker walls can only carry lower loads. For an easy mounting there should be right and left 6-8 cm distance next to the profiles.

Shelves are hooked into the vertical wall profile with bottom supports and can be placed in 4 cm increments. This results in clear distances between the shelves of 10, 14 (for CDs), 18, 22 (for DVDs and paperbacks), 26, 30, 34 (for files), 38 cm, etc. They are available in widths of 80 and 120 cm and in depths of 16, 24 and 32 cm. Depth 40 cm is available on request. The side height is 8 cm (10 cm including the bottom bend). Shelves close at the top and bottom with the vertical wall profiles.

The total depth in the shelf is shelf depth + 3.3 cm (for wall mounting). The shelf depth of 24 cm is ideal for many books. For heavy loads (e.g. illustrated books), the shelf width of 80 cm should be used.

Shelf 0.5 file level
steel sheet 2 mm, powder-coated fine structure, with bottom supports

Article no.	Article	Sales price excl. VAT
M 320 080 024	Shelf 0.5 file level 80 x 24 cm	152.00 €

S	Traffic black		

Tables are suspended in the vertical wall profile with bottom supports. They are available in widths of 80 and 120 cm and in a depth of 80 cm. The side height is 8 cm and the table height 72 cm. The total depth in the shelf is table depth 80 + 3.3 cm (for wall mounting). They are particularly suitable as a small, stable workplace. They can be combined with writing shelves and corpora and placed to match at the same height. To do this, the vertical wall profiles are mounted

on the wall at a height of 32 cm (lowest hole 34 cm). Then the corpus (height 40 cm) hangs at table height 72 cm and ends with the profile at the bottom.

Errors and technical modifications excepted. All prices are recommended retail prices. Deliveries are made exclusively in accordance with our terms and conditions. Further information from page 113.

System M Sideboard

Horizontal wall profiles enable the invisible suspension of corpora of any width with a wide variety of fittings in the System M Sideboard by Thomas Merkel. The same corpus can also be freely placed on feet or mounted on castors for mobility.

Design: Thomas Merkel, 2011

Horizontal wall profile

steel sheet 4 mm, powder-coated fine structure, with screws 5 x 60 mm for wall mounting

Article no.	Article		Sales price excl. VAT
M 100 080 000 S	Horizontal wall profile 80 cm	7 screw holes	29.00 €
M 100 120 000 S	Horizontal wall profile 120 cm	11 screw holes	44.00 €

M 100 200 000 S	Horizontal wall profile 200 cm	19 screw holes	73.00 €
M 100 240 000 S	Horizontal wall profile 240 cm	23 screw holes	88.00 €
^			
S	Traffic black		

Horizontal wall profiles are screwed to the wall and allow the hanging of corpora. The wall profiles are not visible later. The length to be used depends on the corpus dimensions, for example, for 3 corpora 80 cm wide you need a wall profile 240 cm long. If the sideboard is wider than 240 cm, several horizontal wall profiles are required. The grid dimensions (80 or 120 cm) are added for the total external dimension. The total depth (without handle) is corpus depth 40 + 1 cm.

The prerequisite for installation is solid and resilient walls. Weaker walls can only bear lower loads. The spacing of the fixing holes allows the wall profile to be used as a mounting template when several profiles are mounted in a horizontal line. The screw holes are approx. 6 cm below the top edge of the corpora. When mounted at a height of 66 cm (drilled hole), a corpus hangs at table height approx. 72 cm. Wall-mounted sideboards can also be used free-standing on feet

later. Horizontal wall profiles are always shorter than the specified planning dimension. This means they are not visible when installed. Only use wall plugs that are suitable for the wall in question.

Drawer shelf for horizontal wall profile

to balance in corpora with drawers, steel 10 mm, powder-coated fine structure

Article no.	Article		Sales price excl. VAT
M 617 080 032 S	Counterweight	80 x 32 x 1 cm (20 kg)	247.00 €
M 617 120 032 S	Counterweight	120 x 32 x 1 cm (30 kg)	346.00 €

^	
S	Traffic black

The safety bracket fixes the free-standing cabinet to the wall when using several drawers. The counterweight is used to balance the corpus with drawers on castors or when there are back panels or the securing bracket cannot be fitted. They are fitted behind the back panel. One weight can be fitted per corpus from 1 file level upwards. Free-standing corpora with drawers should be protected against tipping over with the safety bracket on the wall.

Corpora with drawers on castors should be secured with counterweights.

Corpora can be fitted with inner drawers behind drawers 1 file level and behind hinged doors 1 file level. The drawer has a self-closing and soft-closing mechanism. Like the inside of the corpus, the inner drawer is Traffic black. The inner drawer or the insert for drawers for hanging files or the attachment for drawers 1 file level can only be optionally fitted in the drawer 1 file level. The accessories can also be retrofitted in existing corpora units.

System M Wallboard

The Wallboard by Thomas Merkel takes up the idea of a single shelf. The shape is familiar, but the material is new: 2 mm sheet steel bent from one piece. Elegant form, high functionality and can be used both as a single piece and in combination with System M Sideboard.

Design: Thomas Merkel, 2014

Horizontal profile for wallboard

steel sheet 3 mm, powder-coated fine structure, felt, with screws 5 x 60 mm for wall mounting

S	Traffic black

The Wallboard is screwed to the wall using a horizontal profile. The profiles are not visible later. Each individual shelf hangs on its own profile. The grid dimensions (80 or 120 cm) are added for the total external dimension. The total depth is floor depth + 1 cm. The prerequisite for installation is solid and load-bearing walls. Weaker walls can only bear lower loads. The shelves can be used individually, in a row or in combination with the corpora. The spacing of the fixing

holes allows the wall profile to be used as a mounting template when several profiles are mounted in a horizontal line. The screw holes are approx. 3 cm below the top edge of the individual shelves. The profiles are always shorter than the specified planning dimension. This means they are not visible when installed. Only use wall plugs that are suitable for the respective wall.

Pair of inner covers for wallboard

steel sheet 1 mm, powder-coated fine structure

Article no.	Article	Sales price excl. VAT
M 401 000 018 S	Pair of inner covers for wallboard depth 18 cm	40.00 €
M 401 000 024 S	Pair of inner covers for wallboard depth 24 cm	41.00 €

^	
S	Traffic black

The inner covers for the Wallboard can also be inserted later. To do this, however, the wallboard must be removed from the profile. They are recessed 6 cm into the side of the wallboard.

Errors and technical modifications excepted. All prices are recommended retail prices. Deliveries are made exclusively in accordance with our terms and conditions. Further information from page 113.

Table M04

The appeal of the Table M04 by Thomas Merkel lies in its visual lightness. The material thicknesses are extremely reduced and the construction is completely embedded in the tabletop. The special feature lies in the single detail: adapters that serve to integrate the legs into the top also connect them visually.

Design: Thomas Merkel, 2004

The Table M04 can be assembled without tools. The table legs are screwed into the recessed adapters. Foot adjustments on each table leg make it possible to compensate for uneven floors. There is felt on their underside. The tables are available in many different sizes. If this is not sufficient, the table sizes can be individualised.

The table height is 74 cm. Lower foot adjustments are available for table height 72 cm.

The edge of the table top is 5 mm natural or black oiled bamboo. In the plywood version, the entire table top is in this finish. Other table edges are possible. Please note that there are slight colour differences between the colour of the laminate and the colour of the powder coating of the table legs and adapters.

Lotus Table

The special feature of the Totus Table by Thomas Merkel lies in the detail. The tabletop and legs seem to merge into one another, yet the legs can be removed for transport.

Square and rectangular individual pieces allow the use in different situations. Variants for outdoor use are also available.

Design: Thomas Merkel, 2014

The side tables are delivered disassembled. The necessary tools are included in the delivery. The frame is in three parts and consists of a base plate, table leg and head plate. The head plate has an integrated thread and is screwed onto the table leg. The base plate is attached to the table leg with the enclosed screw. Once the frame is mounted, only the tray is placed on top. It is fixed to the frame by magnetic points. For hard floors, self-adhesive felt dots are

included that can be fixed under the base plate. The tables can be combined individually. Thanks to the different heights, the tables can also be pushed together to save space. The frames of the side tables are powder-coated. The square and rectangular trays are made of sheet steel and are available in different colours.

Errors and technical modifications excepted. All prices are recommended retail prices. Deliveries are made exclusively in accordance with our terms and conditions. Further information from page 113.

Side Table Kaiser

The Side Table Kaiser by Thomas Merkel, each consisting of two identical elements, unite the exciting contrast between the low thickness of the material of the table surface and the voluminous plinth-like base.

A play of geometric shapes and the evolution of a 2-dimensional material into a 3-dimensional structure.

Design: Thomas Merkel, 2015

Large Kaiser
steel, powder-coated fine structure, with adjustable feet

Article no.	Article		Sales price excl. VAT
MK 100 040 052	Large Kaiser	Ø 40 cm x 52.5 cm	842.00 €
	^		
W	Traffic white

The side table Small Kaiser consists of two identical parts that are screwed together. This means that they can also be dismantled for thorough cleaning. They are delivered assembled. The tables have foot adjustments to compensate for uneven floors. The thickness of the table top is 2 mm. The table surface of the Small Kaiser is doubled. Special colours according to RAL are possible. The surcharge for colour changes for special colours is charged

once per order for each special colour. You can find the available special colours in the respective configurators on our website.

Errors and technical modifications excepted. All prices are recommended retail prices. Deliveries are made exclusively in accordance with our terms and conditions. Further information from page 113.

Side Table Kanji

The design of the Side Table Kanji by Thomas Merkel is inspired by the characters of the Japanese language. Just as the thickness of the strokes varies in calligraphy with a bamboo nib, Kanji changes when viewed spatially: its shape appears linear or two-dimensional depending on the angle of view.

Design: Thomas Merkel, 2014

Kanji H
steel sheet 2 mm, powder-coated fine structure

Article no.	Article		Sales price excl. VAT
MH 100 050 050	Kanji H	50 cm x 31 cm x 50 cm	671.00 €

W	Traffic white		
J	Papyrus white		
A	Traffic grey A		
B	Traffic grey B		
S	Traffic black		
P	Special colour RAL - surcharge for colour change 148,- €		

Kanji is based on a complex production process, because the tables each consist of a single 2 mm thick sheet metal strip whose ends only almost touch. This means that 45 minutes of pure folding work goes into each table. The side tables cannot be used as stools. Special colours according to RAL are possible. The surcharge for colour changes for special colours is charged once per order for each special colour. You can find the available special colours

in the respective configurators on our website. You can find an outdoor version in the Outdoor chapter.

We believe that life is made of changes and it is good if things can change as well, our own development has also taught us this. S+, more than a decade of furniture history, made in Germany.

Nitō

The construction for a piece of furniture was created from a typical connecting element for aluminium.

Nitō is simple, light, stands freely in the room and comes home fully assembled. Like a bridge, it is firmly riveted and functionally complemented by various accessories.

Design: Thomas Merkel, 1993/2021

Special colours according to RAL are possible. The surcharge for colour changes for special colours is charged once per order for each special colour. You can find the available special colours in the respective configurators on our website.

Accessories

aluminium sheet 2 mm, powder-coated, with screws

Article no.	Article	Sales price excl. VAT
MN 800000	Shelf connector	4.00 €
MN 810000	Wall fixing	15.00 €
^		
W	Traffic white	
J	Papyrus white	
A	Traffic grey A	
B	Traffic grey B	
S	Traffic black	
P	Special colour RAL - surcharge for colour change 148,- €	

Connectors are used to link individual shelves placed next to each other. We recommend four connectors per shelf (two at the front and two at the back). For uneven floors, possibly more. The wall fixing is used to secure high shelves to the wall. We recommend using from a Nitō height of 4 (163 cm), when using several drawers and depending on use.

Outsides

aluminium sheet 2 mm, powder-coated, with Shelf connectors and screws

Article no.	Article	Sales price excl. VAT
MN 200010	Outside - 1 - 35 x 50.5 cm	121.00 €

^		
W	Traffic white	
J	Papyrus white	
A	Traffic grey A	
B	Traffic grey B	
S	Traffic black	
P	Special colour RAL - surcharge for colour change 148,- €	

For Nitō 1 (width 40 cm), two back panels are required per compartment and for Nitō 2 (width 75 cm), four back panels are required per compartment.

For Nitō 1 (width 40 cm), one pair of 35 cm wide sliding doors is required per compartment and for Nitō 2 (width 75 cm), one pair of 70 cm wide sliding doors is required per compartment.

Errors and technical modifications excepted. All prices are recommended retail prices. Deliveries are made exclusively in accordance with our terms and conditions. Further information from page 113.

Benchi

Benchi, ベンチ Japanese for bench, is a lightweight aluminium bench that is available in many different colours and impresses with its reduced design and versatility. Whether in the narrow hallway, in the children's room, in the living room or in the conservatory, Benchi adapts and offers space.

Design: Thomas Merkel, 2023

Benchi
aluminium sheet 2 mm, powder-coated, with adjustable feet

The side tables are delivered disassembled. The necessary tools are included in the delivery. The frame is in three parts and consists of a base plate, table leg and head plate. The head plate has an integrated thread and is screwed onto the table leg. The base plate is attached to the table leg with the enclosed screw. Once the frame is mounted, only the tray is placed on top. It is fixed to the frame by magnetic points. For hard floors, self-adhesive felt dots are

included that can be fixed under the base plate. The tables can be combined individually. Thanks to the different heights, the tables can also be pushed together to save space. The bases of the side tables are made of powder-coated stainless steel and. The trays are made of powder-coated stainless steel or aluminium.

General Terms and Conditions of Business

I. Scope

We (S+ Systemmöbel GmbH) – hereinafter referred to as the contractor – work exclusively on the basis of these General Sale, Delivery and Payment terms and conditions of Business. All components of which shall apply as accepted by placing the order. Conflicting purchasing terms of the customer - are not included in the agreement, neither through silence nor delivery, but only through our express written consent for each transaction. Oral ancillary agreements to the agreement do not exist. Ancillary agreements, supplements or changes must be in writing to be effective.

II. Offers

Our offers are subject to confirmation, insofar as not otherwise expressly agreed. All offer information regarding delivery terms, weights, service, necessary equipment, functions, dimensions etc., as well as drawings that relate to the offer, completed specification sheets and general technical data are roughly in accordance with our best judgement, however not binding. We are entitled, to deliver modified and adjusted contractual products deviating from the customer's order insofar as their functionality is not thereby impaired. With respect to any improvements or other justified modifications we reserve the right to change our brochures. We are not obligated to provide special notice regarding these types of modifications. No liability will be assumed for typographical errors.

III. Prices and payment terms

Our prices are net prices. Decisive for the price calculation is the price valid on the date of delivery, insofar as no deviating price agreements have been met; Also, the VAT valid on the date of the delivery will be added. The information on prices contained in our price lists, offers, acceptances as well as letters of confirmation shall apply subject to the proviso that the aforesaid prices shall be correspondingly increased or reduced as a result of unanticipated change in the basis for the calculations due to interventions by the legislature or third parties (e.g. currency appreciations and/or devaluations). If not otherwise agreed, we deliver up to order values of € 920.00 within Germany carriage paid. Payments are to be made within 30 days net following invoice date or as specified in the confirmation of order. Deliveries, which remain in our possession, because the buyer's delivery instructions are pending, shall be invoiced on the agreed date of delivery and are payable within 30 days. Incoming payments will be offset against the debt in the order of accrual. Cheques and

discountable notes shall be accepted pursuant the standard proviso. You will be credited on the date on which we have the countervalue of the security at our disposal. Expenses for discount, bank and collections shall be borne by the ordering party. In the event of exceeding the payment term or incomplete timely payment the ordering party shall be considered to be in arrears, even without reminder notice. We shall be entitled uninjured by other claims, to demand the lawful amount of interest on arrears. If the buyer is in arrears with payment or there is justified doubt in its ability to pay, then we are authorised to set all accounts receivables as payable or demand securities even prior to delivery, to retain pending deliveries under this and other agreements as well as to withdraw in whole or in part from existing agreements.

The customer can only offset with receivables that are undisputed or determined to be legally binding and only to assert a right of retention for such claims that relate to the same contractual relationship. The assertion of the right to refuse to provide a service or the right of retention requires our prior written consent. Orders with agreed prepayment instalments shall be contractually transacted under the proviso that the advance payments are made to contractor as provided for in the schedule. Payment delays shall effect corresponding delivery delays and may in extraordinary cases lead to discontinuation of the work.

IV. Delivery

Shipping and conveying the goods shall be at cost and risk to the ordering party. The risk shall pass to the ordering party as soon as the goods leave the factory or are made available to the ordering party. This transfer of risk shall also apply for free deliveries. Agreed delivery dates apply as satisfied, if the contractual product was transferred to the freight carrier on the agreed delivery date. The delivery date is understood to be subject to unanticipated circumstances and obstacles, independent from whether these occur with the contractor or with the manufacturer, such as acts of god, government measures, labour disputes of any type, sabotage, raw materials shortages, delay in material delivery which is no fault of the parties. These types of events extend the delivery date correspondingly and even if they occur during an existing delay. If the contractor is more than four weeks in arrears with a delivery, the customer may withdraw from the contract, following a grace period specified in writing, excluding further claims. If the delivery delays last longer than six weeks the contractor shall also be entitled in whole or in part to withdraw from the agreement. If orders confirmed by the customer are in whole

or in part cancelled or delivery schedules agreed to with us are delayed, for which it is responsible, the contractor can assert claims for compensation without separate notice, corresponding to the list price of the order. The agreement on the postponement of delivery deadlines must be in writing. In event of delayed acceptance the contractor, in addition to the right to payment shall have the right to either set a new delivery date or to withdraw from the contract. Following delivery orders can no longer be cancelled. The delivery deadline shall be extended irrespective of our rights from the customer delay in the amount of time that the customer is in arrears with its obligations vis-à-vis the contractor.

V. Acceptance

The customer shall immediately inspect the goods after delivery with respect to completeness and conformity pursuant the invoice. If no objection is made within a period of 8 days following receipt of the delivery the delivery shall apply as accepted. Non essential defects, which do not impair the functionality of the deliveries, shall not entitle the customer to decline acceptance.

VI. Guarantee

The contractor guarantees that the quality and workmanship of the contractual products are according to specifications. The warranty claim presupposes that the customer is not in default vis-à-vis payment. Warranty claims against the contractor begin upon delivery to the customer and shall be time-barred twelve months from delivery. They are not transferable. In the event of warranty claim, a subsequent improvement or substitute delivery shall be at the discretion of the contractor. Replacement parts shall become property of the contractor. In the event defects are not remedied by the contractor within an appropriate grace period specified in writing, the customer shall be entitled to either rescind the agreement or to demand an appropriate reduction in the purchase price. If the review of a notice of defect decides that a warranty claim does not exist, the contractor shall be entitled to claim reimbursement of all its expenses. Costs of the inspection and repairs shall be calculated based on each of the contractor's valid service prices. 6) All further claims of the customer provided for under these terms or otherwise, particularly liability for direct damages, entirely regardless of legal foundation, are excluded, insofar as not otherwise agreed.

VII. Liability

Our liability is restricted to such damages, which

Version 01.01.2013

were reasonably to be expected, given the circumstances known at the time of the conclusion of contract. The contractor shall not be liable for indirect damages, consequential loss/damage caused by a defect or loss of profits. The liability of the contractor for malicious and grossly negligent actions, for guaranteed quality as well as pursuant the provisions of the product liability act remain unaffected by the aforementioned liability restrictions. The personal liability by contractor members, who are acting as our agents, is excluded. Claims for damages shall be time barred upon expiration of six months after delivery and/or provision of the service.

VIII. Payment proviso

Our obligation under this agreement exists under the caveat of the customer's creditworthiness. In the event of significant worsening of the financial circumstances, in the event of suspension of payment, compulsory execution, the opening of insolvency proceedings, dissolution or transfer of business or death of the customer or if the customer pledges the purchased goods or grants them as security to other creditors or if it is in arrears with us for previous deliveries, we are entitled to demand security and if this is not sufficiently provided, to withdraw from the agreement or to demand compensation for damages. This shall apply correspondingly if we receive unfavourable information on the customer's creditworthiness. If we withdraw from the agreement, all transport, warehouse and other costs shall be borne by the customer. Our deliveries are exclusively for resale to end-users. In the event of resale of our goods to dealers we reserve the right to withdraw from the agreement and cease further deliveries.

IX. Retention of title

The contractual product remains our property until satisfaction of all current and future claims under this contract and moreover from the entire business relationship with the customer. The customer shall have the revocable right to transfer the reserved goods in the due course of business under retention of title, however not to pledge or assign security in any form whatever. In the event a third party accesses the reserved goods, the customer shall instruct them that they are the contractor's property and notify us immediately. In the event of resale to third parties the customer shall be responsible that the third party adheres to the contractor's rights. In the event of payment delay, also in other and future contractor deliveries or services to the customer, or dwindling assets of the customer, the contractor may enter the business premises of the

customer to assert the retention of title to the reserved goods and take possession of the reserved goods. If the buyer withdraws the delivery object on the basis of the retention of title this shall not apply as a withdrawal from the agreement. The seller shall be permitted to sell the reserved goods. Assertion of the retention of title or the garnishment of the object of the delivery by the contractor shall not apply as a withdrawal from the agreement if the customer is a dealer. At the point in time of placing the order, the customer shall assign its accounts receivables from the resale of the reserved goods to the contractor in advance in the respective invoice value of the reserved goods. The contractor shall be entitled and obligated to collect in the framework of the due course of business. At the contractor's request the customer shall specify the assigned accounts receivables. The contractor may disclose this assignment at any time in order to secure its pecuniary claims. If the value of these securities exceeds the contractor's pecuniary claims by more than 20%, the contractor shall at the request of the customer release the excess amount of the securities. For testing and demonstration purposes delivered objects remain the contractor's property. They may be used by the customer only based on separate agreement with the contractor.

X. Third party industrial protection rights and trademarks

The contractor assumes no liability that the contractual products do not breach any industrial property rights or third party trademarks. The customer is therefore to immediately notify the contractor of all claims levied against it. If the delivered products were manufactured pursuant customer designs or instructions, the customer shall release the contractor from all claims that are asserted by third parties due to the breach of industrial property rights and trademarks as desired. Any court costs are to be correspondingly advanced.

XI. General Terms and Conditions

The customer is not entitled to transfer its claims under this agreement. Place of performance and jurisdiction is Cologne. The contractor is however entitled to sue the distribution partners at any other legal venue. The Convention for the Purchase of Goods (EKG), the Standard Conclusion of Contract Act (EAG) as well as the Viennese UN agreement on the sale of international goods (UNCITRAL) are excluded. Order processing within contractor is via automatic data processing. The customer herewith declares its express consent to processing the data which has been made known to the contractor in

the context of the contractual relationship and which is necessary to process the order. The customer is also thereby in agreement that the contractor uses the data it has received through the business relationship in the sense of the data protection act for contractor business purposes including within companies affiliated with the contractor. If one or more terms of these General Terms and Conditions of Business are or become inoperable or this contract text contains loopholes, the contractual parties shall agree that the inoperable or incomplete terms be replaced or supplemented by such terms corresponding as closely as possible to the commercial purpose of the desired term. The validity of the remaining terms are thereby unaffected.

Imprint

S+ Systemmöbel manufactures shelves, sideboards, tables, side tables and benches that are characterised by a reduced design language and adaptability. They are well thought-out, unobtrusive and offer suitable variants for every situation in which they are used.

The Planning book is intended to make it easier for the user to handle our system furniture. It is much more than a price list. It provides assembly and care instructions and facilitates planning with its detailed descriptions.

Errors and technical modifications excepted. All prices are recommended retail prices in EURO excluding VAT ex works.
