

Press release on the S+ Jubilee colour

S+ Jubilee colour 2023 - Papyrus White RAL 9018

To celebrate the 10th anniversary of S+ Systemmöbel, we have come up with something very special and chosen a new colour that perfectly matches our philosophy of producing furniture with timeless design and the highest quality. We are very pleased to present our anniversary colour Papyrus White!

Papyrus White is an elegant and subtle colour that brightens up rooms in a unique way and gives them a welcoming atmosphere. It is a colour that can be easily integrated into any interior and suits both modern and classic styles. Papyrus White is versatile and harmonises with other colours and materials.

You can now find Papyrus White RAL 9018 as another standard colour in all our configurators.

"The colour Papyrus White has been with me for quite a long time. One of the many nuances of white, of which there are endless variations. White does not lack colour, but white becomes colour through light and shadow. Fullness is found here in restraint. Papyrus white is reminiscent of celadon, resembles both water and sky and requires a second look. It has a thousand-year history and has thus long proven its timelessness. In combination with other whites it shows its individual character. A good choice for my kind of design, which is always considerate of what is there."
